

MEET THE LEADER IN GRAVITY-FED WATER PURIFICATION

Berkey® water purification systems* are powerful, freestanding gravity-fed water purifiers. Simply pour water from virtually any source into the top chamber and the gravity-fed Black Berkey® Purification Elements do all the work. Dispense purified water from the lower chamber through a handy spigot. Berkey® systems are portable and simple to use - no electricity, tools or plumbing needed. They are also economical, lasting up to 6,000 gallons per pair of Black Berkey® Purification Elements. Have access to clean, purified water anywhere - at home, abroad, in the great outdoors or during an emergency.

The Black Berkey® Purification Elements are the gold standard in water purification. They are powerful enough to purify both contaminated municipal tap water as well as untreated, questionable water from harsh sources such as lakes, rivers, streams and ponds.

✓ In Control & Confident

Take control of your tap water, and enjoy peace of mind. Berkey® water purification systems address a broad universe of potential contaminants while leaving in the beneficial minerals your body needs.

✓ Prepared & Empowered

Be ready for natural disasters and sudden emergencies. Berkey® water purification systems can purify raw, untreated water in situations where a potable source of water is not available.

*Not all systems available in CA or IA
